

Pipeline Analytics and Sales Forecasting

Unite consistent sales execution and accurate forecasting through data-informed pipeline analytics

According to [Gartner](#), over half of sales leaders do not have high confidence in their organization's forecast accuracy. There are many factors that play a role, including limited pipeline visibility, a lack of relevant data in the CRM, and manual processes that take time and can cause errors.

Xactly Forecasting is purpose-built to address these challenges by providing more accurate forecasts and helping sales leaders drive greater revenue predictability and consistent sales process execution.

FORMALIZE FORECASTING PROCESSES TO CRUSH YOUR NUMBERS

Structure forecasting processes while allowing easy configuration to meet unique business needs, enabling sales and revenue leaders to:

- ▶ Uncover opportunity risks early in the sales process based on data-driven insights.
- ▶ Increase pipeline visibility and improve revenue predictability for cross-functional teams like Finance, HR, and Operations to boost confidence in sales numbers.

IMPROVE PIPELINE INSPECTION WITH DYNAMIC HEALTH AND CONFIDENCE SCORING

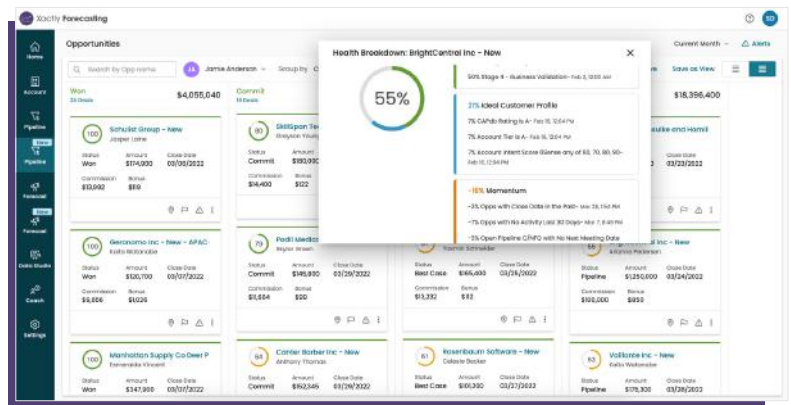

Provide sales managers and operations teams the ability to closely monitor sales pipeline health via filters that quickly sort and pinpoint data required to:

- ▶ Identify forecast-worthy opportunities based on deal-level ML capabilities that explain in detail why an opportunity will win.
- ▶ Evaluate and strategize each deal holistically via opportunity-level health scores, sales process milestones, sentiment analysis, and more.

INCREASE ACCURACY WITH MULTI-LEVEL, AI-AUGMENTED FORECASTS

Create interactive, multi-level, tailored visualizations across teams, products, or revenue types for a more efficient and holistic understanding of your pipeline to:

- ▶ View deal progression across the sales cycle and inspect pipeline changes over given periods.
- ▶ Improve forecast accuracy at every level of the sales hierarchy using built-in machine learning (ML) metrics tailored to your organization.

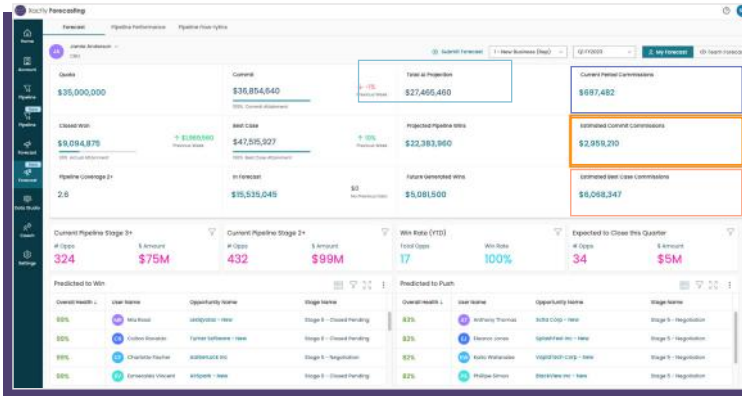

FORECAST COMMISSIONS ALONGSIDE PIPELINE MOVEMENT

Automate processes involved in commission earnings forecasting by combining the power of Xactly Incent and Xactly Forecasting to address a constantly shifting pipeline that impacts projected revenue and costs to:

- ▶ Enable Finance teams to run prediction models more frequently and clearly visualize potential commissions alongside revenue pipeline data.
- ▶ Provide sellers a lens into their potential commissions, motivating urgency and giving validation of efforts.
